

Designed for nonresidential new construction and renovation/remodel projects, Savings by Design targets primary decision-makers: building owners, developers, architects, engineers, designers, contractors, builders, and energy consultants. Savings By Design analyses provide detailed technical and financial assistance data that allows owners and design teams to make informed decisions regarding energy efficiency features.

This statewide approach offers the nonresidential building industry a multi-faceted program designed to consistently serve the needs of the building community throughout California. Savings By Design encourages energy-efficient building design and construction practices, promoting the efficient use of energy by offering up-front design assistance supported by financial incentives based on project performance.
